## SUMMARY

---

Savvy front-end developer with a niche in SharePoint and design. Ten years of experience creating intranet solutions within SharePoint to help organizations improve work efficiency and automate business processes. During this time, I have also developed and maintained B2B and public facing web sites using front-end technologies ASP.NET, HTML, XML, CSS, and JavaScript. Managed small to medium projects using waterfall methodology and scrum (agile framework). Passionate about designing effectively to improve user experience with technology.

## TECHNICAL SKILLS

- Front-end Technologies: HTML5, CSS3, JavaScript, XML, ASP.NET
- SharePoint Platforms: 2010, 2013, 2016, and Office 365
- SharePoint Farm Administration: 2010 and 2013
- InfoPath and Nintex Form Development
- Workflow Automation (SharePoint Designer / Nintex / K2)
- UX and Graphic Design (Adobe Creative Suite and Sketch)
- Customization of CMS Systems / Intranet Portals
- Project Management (Agile Scrum and Waterfall)
- Discovery and Requirements Gathering
- Version Control Systems (TFS and Git / GitHub)
- Database Management (SQL Server)
- Active Directory / Forefront Identity Manager
- Visual Studio

## PROFESSIONAL ACCOMPLISHMENTS

---

### SharePoint Administrator

February 2018 – June 2018

#### Unified Business Technologies (Detroit Arsenal)

- Gathered project requirements from stakeholders and translated into technical solutions.
- Developed custom solutions within the SharePoint 2010 platform to improve daily business operations efficiency.
